

California Common Core Community Forums

Come learn how Rocklin is preparing our students and teachers to make the shift to the California Common Core State Standards.

The California Common Core State Standards were adopted by the California State Board of Education on August 2, 2010. The California Common Core State Standards provide a consistent, clear understanding of what students are expected to learn. The standards are designed to be robust and relevant to the real world, reflecting the knowledge and skills that our students need for success in college, careers, and the 21st Century.

The community forums are an opportunity for you to learn more about Rocklin's transition to California Common Core State Standards. The Spring Forums will focus on Math in the Common Core and the coming Smarter Balanced Assessment Field Tests.

Take this opportunity to engage in hands-on learning activities designed to increase your knowledge and understanding of the California Common Core State Standards.
